Natural Values

Understanding of natural values

Sampling summary

Table 1: Summary of monitoring campaigns in the study area, showing the survey dates, sampling method, management zones sampled, and the number of samples with each data type. NPZ = National Park Zone, HPZ = Habitat Protection Zone, MUZ = Multiple Use Zone, SPZ = Special Purpose Zone.

Date	Campaign name	Method	Areas	Samples	Habitat	Fish	
					Count	Count	Length
May 2021	2021-05 Abrolhos BOSS	BOSS	NPZ, SPZ	46	46	-	-
May 2021	2021-05 Abrolhos stereo-BRUVs	BRUV	NPZ, SPZ	24	24	23	23
Feb-Mar 2025	2025-02 Yamatji-Shallow-Bank stereo-BRUVs	BRUV	NPZ, SPZ	120	115	114	109

Benthic ecosystem extent

Observations

Figure 1: Habitat classes observed in spatially balanced stereo-BRUV and drop-camera imagery visualised as spatial pie charts, pooled across the 2021 and 2025 surveys. Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters. Bathymetric contour at 30 m is shown.

Dominant habitat types

Figure 2: Predicted dominant habitat type from stereo-BRUV and drop-camera groundtruthing, pooled across the 2021 and 2025 surveys. Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters. Bathymetric contour at 30 m is shown.

Habitat distribution and probability

Figure 3: Predicted habitat class distribution from stereo-BRUV and drop-camera groundtruthing, pooled across the 2021 and 2025 surveys. Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters. Bathymetric contour at 30 m is shown.

Functional reef distribution and probability

Figure 4: Predicted reef distribution probability and uncertainty from stereo-BRUV and drop-camera groundtruthing, pooled across the 2021 and 2025 surveys. Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters. Bathymetric contour at 30 m is shown.

Benchmarks of benthic natural values

Sand

Figure 5: Sand: spatial plots of distribution probability and uncertainty from stereo-BRUV and drop-camera groundtruthing, pooled across the 2021 and 2025 surveys. ABMP = Abrolhos Marine Park (Commonwealth). Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters. Bathymetric contour at 30 m is shown.

Macroalgae

Figure 6: Macroalgae: spatial plots of distribution probability and uncertainty from stereo-BRUV and drop-camera groundtruthing, pooled across the 2021 and 2025 surveys. ABMP = Abrolhos Marine Park (Commonwealth). Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters. Bathymetric contour at 30 m is shown.

Kelp

Figure 7: Kelp: spatial plots of distribution probability and uncertainty from stereo-BRUV and drop-camera groundtruthing, pooled across the 2021 and 2025 surveys. ABMP = Abrolhos Marine Park (Commonwealth). Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters. Bathymetric contour at 30 m is shown.

Rock

Figure 8: Rock: spatial plots of distribution probability and uncertainty from stereo-BRUV and drop-camera groundtruthing, pooled across the 2021 and 2025 surveys. ABMP = Abrolhos Marine Park (Commonwealth). Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters. Bathymetric contour at 30 m is shown.

Sessile invertebrates

Figure 9: Sessile invertebrates: spatial plots of distribution probability and uncertainty from stereo-BRUV and drop-camera groundtruthing, pooled across the 2021 and 2025 surveys. ABMP = Abrolhos Marine Park (Commonwealth). Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters. Bathymetric contour at 30 m is shown.

Benchmarks of demersal fish natural values

Survey effort

Figure 10: Spatial distribution of observed species richness and total abundance (MaxN) per stereo-BRUV deployment, shown separately for the 2021 and 2025 surveys. Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters.

Species richness

Figure 11.1: Demersal fish - Species richness: benchmark plots by zone and depth contour from stereo-BRUV groundtruthing. ABMP = Abrolhos Marine Park (Commonwealth).

Figure 11.2: Demersal fish - Species richness: species accumulation curve by year and zoning status from stereo-BRUV groundtruthing. ABMP = Abrolhos Marine Park (Commonwealth).

Species richness

Figure 11.3: Demersal fish - Species richness: spatial plots of distribution probability and uncertainty from stereo-BRUV groundtruthing, shown separately for the 2021 and 2025 surveys. Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters. Bathymetric contour at 30 m is shown.

Total abundance

Figure 12.1: Demersal fish - Total abundance: benchmark plots by zone and depth contour from stereo-BRUV groundtruthing. ABMP = Abrolhos Marine Park (Commonwealth).

Figure 12.2: Demersal fish - Total abundance: top 10 most abundant species in each survey year from stereo-BRUV groundtruthing. ABMP = Abrolhos Marine Park (Commonwealth). Species appearing in only one year's top 10 are shown in bold.

Total abundance

Figure 12.3: Demersal fish - Total abundance: spatial plots of distribution probability and uncertainty from stereo-BRUV groundtruthing, shown separately for the 2021 and 2025 surveys. Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters. Bathymetric contour at 30 m is shown.

Large Reef Fish Index*

Figure 13.1: Demersal fish - Large Reef Fish Index*: benchmark plots by zone and depth contour from stereo-BRUV groundtruthing. ABMP = Abrolhos Marine Park (Commonwealth). *Large Reef Fish Index representing the biomass of all fish greater than 20 cm (B20) has been adapted here for stereo-BRUV data by removing sharks and rays.

Figure 13.2: Demersal fish - Large Reef Fish Index*: top 10 greatest biomass species in each survey year from stereo-BRUV groundtruthing. ABMP = Abrolhos Marine Park (Commonwealth). The 2021 survey is shown pooled across zones because only five deployments were in fished waters.

Large Reef Fish Index*

Figure 13.3: Demersal fish - Large Reef Fish Index*: spatial plots of distribution probability and uncertainty from stereo-BRUV groundtruthing, shown separately for the 2021 and 2025 surveys. Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters. Bathymetric contour at 30 m is shown.

Reef fish thermal index

Figure 14.1: Demersal fish - Reef Fish Thermal Index: benchmark plots by zone and depth contour, with annual sea surface temperature (black line, grey band = SD) overlaid, from stereo-BRUV groundtruthing. ABMP = Abrolhos Marine Park (Commonwealth).

Figure 14.2: Demersal fish - Reef Fish Thermal Index: species thermal niche of the top 10 most abundant species in each survey year from stereo-BRUV groundtruthing. ABMP = Abrolhos Marine Park (Commonwealth).

Reef fish thermal index

Figure 14.3: Demersal fish - Reef Fish Thermal Index: spatial plots of distribution probability and uncertainty from stereo-BRUV groundtruthing, shown separately for the 2021 and 2025 surveys. Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters. Bathymetric contour at 30 m is shown.

Threatened species

Table 2: Threatened species recorded in stereo-BRUV imagery across all survey years, showing IUCN Red List category, the number of samples each species was recorded in, and the total abundance (MaxN) summed across those samples. *This species is also listed as ‘Conservation dependent’ on the EPBC Act List of Threatened Fauna. ^This species is also listed as ‘Vulnerable’ on the EPBC Act List of Threatened Fauna.

Species	Common name	Family	IUCN category	Samples	Total MaxN	Years recorded
<i>Carcharhinus plumbeus</i>	Sandbar Shark	Carcharhinidae	Endangered	18	19	2021, 2025
<i>Loxodon macrorhinus</i>	Sliteye Shark	Carcharhinidae	Near Threatened	5	6	2025
<i>Sepia apama</i>	Giant cuttlefish	Sepiidae	Near Threatened	5	5	2025
<i>Rhynchobatus australiae</i>	Whitespotted Guitarfish	Rhinidae	Critically Endangered	4	4	2021, 2025
<i>Taeniurops meyeri</i>	Blotched Fantail Ray	Dasyatidae	Vulnerable	3	3	2021, 2025
<i>Carcharhinus albimarginatus</i>	Silvertip Shark	Carcharhinidae	Vulnerable	2	2	2025
<i>Galeocerdo cuvier</i>	Tiger Shark	Carcharhinidae	Near Threatened	2	2	2021, 2025
<i>Carcharhinus sorrah</i>	Spot-tail Shark	Carcharhinidae	Near Threatened	1	1	2025
<i>Sphyrna lewini</i> *	Scalloped Hammerhead	Sphyrnidae	Critically Endangered	1	1	2021

Threatened shark and ray species

Figure 15.1: Occurrence of threatened, IUCN Red List category, sharks and rays in stereo-BRUV imagery, shown across all survey years. Points are scaled by abundance (MaxN) and coloured by survey year; grey points show every stereo-BRUV deployment. Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters.

Other shark and ray species

Figure 15.2: Occurrence of shark and ray species that are not threatened in stereo-BRUV imagery, shown across all survey years. Points are scaled by abundance (MaxN) and coloured by survey year; grey points show every stereo-BRUV deployment, so a panel with no coloured points is a genuine absence rather than an absence of sampling. Commonwealth marine park boundaries are shown. The red line delimits state and commonwealth waters.
